D: Essays

Please imagine you are celebrating your 60th birthday together with your family and friends. The atmosphere is very friendly, suddenly your grand-daughter jumps on your lap and asks you the following question: "Grandfather / Grandmother, what have you done in your life?"

Please describe in 150 to 200 words what you WOULD LIKE to answer:

My dearest grandchild, I have done a lot and achieved tremendously in my life. First, I ploughed back to the community for it saw me through education by operating welfare societies which catered for needy children.

Nevertheless, I served people by treating the poor. I organized free medical camps in the remote areas of the country and offered medical service to the elderly and the poor citizens

Furthermore, I empowered the girlchild through educating her against malpractices like Female Genital Mutilation. I also spread word on the importance of education to the girlchild. I rebuked early marriages and offered refuge to those who had escaped from these harmful practices.

Nonetheless, I saw my own children to academic heights. Despite my being busy, I always spent ample time with them and that is why your parents are now as successful as you see them.

I urge you to work hard and live an even better life. Make it your aim to serve all, overlooking creed, race or colour thus becoming a role model to many and you shall surely live a legacy.

What are your (professional) ambitions, and how will secondary education help you achieve your goals in life (100 to 150 words)

My ambition is to get an honours degree in medicine. I aspire to be a medical doctor. I would like to be one of the most prominent doctors in the continent, not because of my qualifications but because of the service that I would offer.

Secondary education will help me achieve my goal career as the fundamental subjects key to the study of my course (basically the sciences) are taught. For I to be able to study medicine, I have to get an aggregate grade 'A' at the Kenya Certificate of Secondary Education examination. Thus without secondary education, it will be impossible to secure a place in the university.

Which are your favourite subjects and why?

My favourite subjects are the three sciences - Physics, Chemistry and Biology plus Business studies. The 3 sciences are my career subjects while Business studies helps me to develop inquiry, critical thinking and rational judgement.
