C: CAREER CHOICE AND ADDITIONAL INFORMATION

What are your top three career choices and explain why these could be your career(s) of your choice:

- DOCTOR
I would like this career in order to become a helpful woman in my village because, when most people get this job, they run to town leaving the people in the village suffering from different serious diseases.
- TEACHER
I would like to become a teacher in order to teach all the young people the importance of working hard in their studies in order to become important people in life.
- CHILDREN RIGHTS ACTIVIST
The young people in my village are very mistreated by their parents so I want to become children rights activist in order to help them.

D: ESSAY AND MOTIVATION

Please imagine you are celebrating your 60th birthday together with your family and friends. The atmosphere is very friendly, suddenly your grand-daughter jumps on your lap and asks you the following question: "Grandfather / Grandmother, what have you done in your life?" use space provided below.

As I grew up I realised how needy we were in my family. That could not discourage me, instead I worked more harder in my primary school studies. I learnt in Namada primary school. I was well behaved. When I reached in class eight I did my M.C.P.E exam and got three hundred and seventy one marks. I was very happy and proud of myself. Although my parents were not able to pay school fees for my secondary school education, I was sponsored by Education International and went to Bahari Girls' high school. There I worked hard and at last I got very good grades.

I went to Kenyatta university and there, I studied the course of becoming a doctor. I knew that, by becoming a doctor I would not only help my family members but the whole of my village. At the end of four years, I did my exams and passed well. I was called at Namada dispensary hospital ready to start my work. When I started my work, I was twenty five years old.

While working, I helped many people including children who suffered from nutritional deficiency diseases. I contributed anything where possible like buying food for the children who suffered. The high mortality rate now reduced and people lived in clean environments happily. I did my work with all my efforts. The living standards of many people raised. I worked in my local hospital until when I reached sixty years and retired.
